

REMARKS

The examiner is kindly requested to continue prosecution on this application and enter the herein presented amendment.

The examiner objected to claim numbering in the previous amendment. All old claims have been cancelled.

The examiner issued a restriction. All current new claims are directed to a single invention.

The examiner rejected the old system claims under 35 U.S.C. 102(b) as being anticipated by Viking Freight.

The applicant presents new claims that are patentable over Viking Freight and all other references since Viking Freight does not teach each and every limitation of the new claims.

The applicant feels that the examiner will find the new claims to be patentable, and therefore respectfully requests that the examiner place the case in condition for allowance at his earliest convenience.

Respectfully Submitted

Arthur A. Gasey
